

Congress Follow-Up Report

Executive Summary:

On September 12 to 16, 2020, ([organization name](#)) was represented at the 28th International Congress of The Transplantation Society in Seoul, South Korea. The purpose of attending was to:

- Identify solutions to the problems our department faces today or may face in the future
- Find new ways we can better perform at better cost-efficiency over time
- Keep our finger on the pulse of the industry so that we know where it is going and how these changes will affect ([organization name](#))
- Fulfill continuing educational requirements to maintain my certification, and;
- Establish contacts at other companies, universities, regulatory agencies, vendors and delegates that can help us continue to deliver high performance.

Solutions:

A number of items have been identified to be of beneficial impact to our organization which are described as follows:

Existing Process Improvements:

([issues we are currently struggling with](#))

Leading Edge Concerns:

([new rule changes that are about to be implemented](#))

Networking Takeaways:

([new contacts, why they are important for the department, who will follow-up and when](#))

Trade Show Exhibit Takeaways:

([information gathered from the Exhibit area about products and services of interest](#))

Program Ideas or Recommendations Inspired from the Congress:

([what process or innovation is your organization currently doing that could be showcased at a future TTS event, who will prepare and submit an abstract to cover this topic from your organization](#))

Action items:

([who will do what and when; dissemination plan for briefing staff on information gathered, timeline for planning for the next TTS Congress](#))

Conclusions and Recommendations:

([Comment on the overall cost-effectiveness of the TTS 2020 experience. Would you recommend continued attendance from your organization?](#))
